AstroCalc is a planetarium program used to view both dynamic and static celestial images. The dynamic ones are stereoscopic -- a pair of images are shown to the right and left eyes at different times, resulting in the illusion of depth. The static images can either be shown as a single frame, as a sequence of frames, or as an animation. AstroCalc is a program that can either be run in a small window, or fullscreen. One is shown below. AstroCalc is an impressive planetarium program with many options for making your stargazing experience as accurate as possible. With AstroCalc you can: - Use the fullscreen mode to enjoy stereoscopic and static images in a bigger window. - View a sequence
